DENOVA

Automatic Spreading Machine (With Servo Motor)
(OM-1601, OM-1801, OM-2001, OM-2201)

Automatic Spreading Machine

Produced for all types or low density fabrics.
Applied cutting or zig zag spreading during the spreading process when desired
Easy using with electronic clutch system.
Counting system for every layer on screen.
Tidy side wall with sensor control.

Features / Benefits:

- Prouduced for all types of low density fabrics.
- Easy using from one point with Direct Drive system.
- PLC controlled full otomatic spreading machine.
- Automatic stoping with security sensors.
- Manuel tension control system.
- Edge control system which is sensetive to different speeds. Auto Stop Feature, when the Fabric Roll runs out.
- The ability of free tension, sensitive and high performance spreading with servo motors.
- Special designed fabric reference photocell, enables to spread the beginning of the fabric.
- Preservation of previously laid fabric in memory.
- Compact Design Power Panel.
- Special Touch Screen and Software for easy handling and easy maintance.
- Easy Tensionless Spreading ability, with special software feature.
- Ability to enter different speed values during nonspreading returns, that gaings time.
- Ability to fully autonomous Spreading.
- Auto Stop Feature, if the required number of ply is achieved

Technical Specifications:

- Max. Working Width: 180 cm/220 cm
- Max. Table Width: 200 cm / 240 cm
- Max. Fabric Roll Diameter: 60 cm
- Max. Fabric Roll Weight: 200 kg +/-
- Max. Speed: 120m/dak.
- Max. Spreading Height: 26 cm +/-
- Voltage: 220V
- Power Consumption: 2.5 kW
